active
Status of each formulation in the archive
Initial preseason
SUPERSEDED
event-time adaptation
camp-history observations
H72 D7
Canonical preseason
SUPERSEDED
event-time adaptation
camp-history observations
H72 D7
?
Rich-history camp
RETIRED
fitness–fatigue response
rich-monitoring observations
H72 D7
?
Solid arrows: direct parent links recorded in the published lineage (5 of 8). They are not a calendar timeline.
? and dashed stubs: direct scientific parent not recorded (3 of 8).
Episode-response tasks · H24, H48 and H72 targets
Preliminary post-exposure
SUPERSEDED
biexponential episode response
paired-trial summaries
H24 H48 H72
?
Phase-consistent
SUPERSEDED
biexponential episode response
phase-consistent force trace
H24 H48 H72
Correlated exposure
SUPERSEDED
correlated exposure response
phase-consistent force trace
H24 H48 H72
Threshold response
PROPOSED
threshold response
phase-consistent force trace
H24 H48 H72
Fixed-mode discrepancy
ACTIVE CANDIDATE
fixed-mode discrepancy
phase-consistent force trace
H24 H48 H72
