a
Camps are the unit of separation (one square = 1 camp = 250 episodes = 750 horizon rows)
Training · 96 camps
Development · 16
Evaluation roots · 16 each
Root A
Root B
Root C
Three fixed evaluation roots share one generator and differ only by public seed;
they are not independent human cohorts.
b
Rows per split (3 rows per episode)
Training
Development

c
One episode: three queries, one split
kept together
query H24 · 2 targets
query H48 · 2 targets
query H72 · 2 targets
Checked for separation
participant · episode ·
query · camp ids
Excluded predictors
group keys · target labels ·
future-time fields · hidden
effects, oracle states
Predictors: 82 source fields → 84 numeric columns
